

## GROWER CAGE

Special floor design of 1" x 1" grid reduces and provides comfort and minimize injury to the young birds. Not only strong floor support, the cage provide very good air circulation and uniform lighting. The slanting front cage system are designed for easy access and this enhance management of birds.

**Benefits :** Excellent uniform flocks, feed saving and less labour and mortality.

### ► Cage Specification

Model	Grower
Period	30 days to 105 days
Density of bird per compartment	18 birds to 20 birds
Cage floor area	6039cm <sup>2</sup> (936in <sup>2</sup> )
Cage depth	660mm (26")
Cage width	915mm (36")
Cage height	483mm (19")
<b>Cage section specification</b>	
Cage section length	1829mm (72")
<b>A</b> Cage width ( with feed cart )	2466mm (97")
<b>B</b> Cage width ( without feed cart )	2284mm (90")
<b>C</b> Center cage stand	2197mm (86.5")
<b>D</b> Cage height ( with feed cart )	1824mm (71.8")
<b>E</b> Cage bottom height	528mm (20.8")
Cage design	Wire material
<b>System length</b>	
With feed cart	Cage length + 2440mm (96")
