

GROWER CAGE

Special floor design of 1" x 1" grid reduces and provides comfort and minimize injury to the young birds. Not only strong floor support, the cage provide very good air circulation and uniform lighting. The slanting front cage system are designed for easy access and this enchance management of birds.

Benefits : Excellent uniform flocks, feed saving and less labour and mortality.

Cage Compartment Specification		Grower
Period		30 days to 105 days
Density of bird per compartment		18 birds to 20 birds
Cage floor area		6039cm ² (936in ²)
Depth		660mm (26")
Width		915mm (36")
Height (Front)		483mm (19")
Cage section specification		
	Cage section length	1829mm (72")
A	Cage width (with feed cart)	2466mm (97")
B	Cage width (without feed cart)	2284mm (90")
C	Center cage stand	2197mm (86.5")
D	Cage height (with feed cart)	1824mm (71.8")
E	Cage bottom height	528mm (20.8")
	Cage design	Wire material
System length		
	With feed cart	Cage length + 2440mm (96")
